PROFILE INFO

Aspiring Computer Science Engineering student with foundational knowledge in programming (C, Python) and web development (HTML). Enthusiastic to learn new technologies and contribute to impactful projects. Looking to enhance skills and gain hands-on experience through practical problem-solving and collaborative work.

PROJECT

1. Simple Calculator

Developed a calculator program in C that performs basic arithmetic operations like addition, subtraction, multiplication, and division.

2. Personal Webpage

Created a static webpage using HTML to showcase personal details like name, education, and skills.

Used headings, paragraphs, and lists for structured content presentation.

3. Temperature Converter

Built a Python program to convert temperature between Celsius and Fahrenheit.

Utilized conditional statements and input/output functions for seamless user interaction.
